Installing DVWA

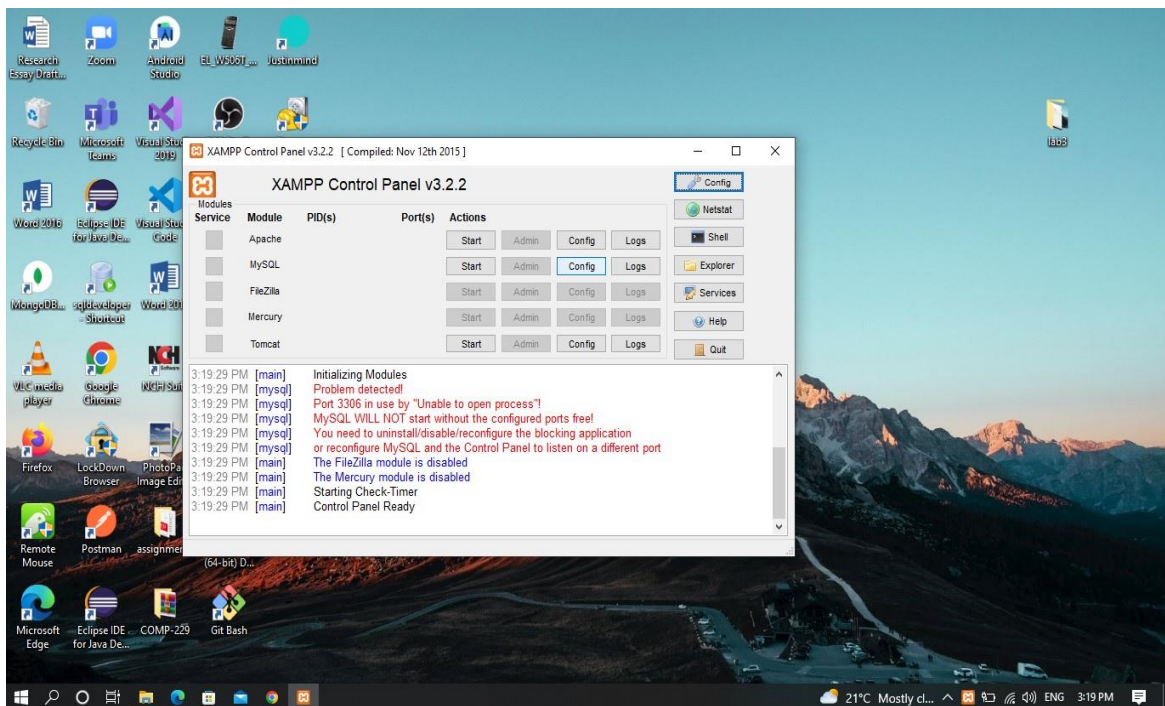

1. Download the files:
 - a. XAMPP (xampp-portable-win32-7.1.8-0-VC14-installer)
 - b. DVWA
2. Extract XAMPP and DVWA in a fast drive (don't use the H: drive or a slow USB drive):
3. Copy XAMPP to the C: drive

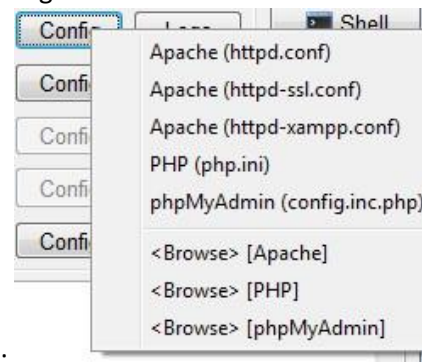

4. Wait until you see this:
5. Click Enter. Click xampp-control.exe. You will see this:

6. Click Save. You will see this:

7. The text in red might vary. Notice the line 'Port 80....'.
8. **Starting Apache.** Click 'Start' on the Apache line. Either Apacheweb server starts (indicated by a green background; go to **Starting MySQL** step) or you get some red lines. In this click the

'Config' button in the Apache line. You will see this:

9. **Change the line:** *Listen 80* To ***Listen 8081***

10. Change the line: *ServerName localhost:80* to ***ServerName localhost:8081***

11. Close notepad

12. Start Apache. You will eventually see this:

13. **Start MySQL.**

14. **Copy DVWA folder into htdocs**
